

THE GIT TREE OF VERSION CONTROL

- ❖ WITH THE GIT TOOL YOUR NEW DEVELOPMENTS CAN BE DONE WITH BRANCHES
- ❖ THESE BRANCHES ALLOW FOR INDEPENDENT DEVELOPMENT
- ❖ THIS PROTECTS THE WORKING CODE FROM THE HAZARDS OF NEW DEVELOPMENT
- ❖ THE SEPARATE BRANCH CAN BE MODIFIED, BROKEN, OR DELETED ENTIRELY WITH NO CONSEQUENCE TO THE WORKING VERSIONS
- ❖ TEAM BASED WORK CAN HAPPEN SIMULTANEOUSLY ON DEDICATED BRANCHES WITHOUT INTERFERENCE
- ❖ WHEN A BRANCH IS READY IT CAN BE EASILY REMERGED WITH THE WORKING CODE.
